Background

The Krusty Krab is the most successful restaurant in Bikini Bottom, run by Mr. Krabs with help from SpongeBob, Squidward, and their friends. After years of failing to steal the Krabby Patty secret formula, Plankton and Karen have launched a new plan: attack the Krusty Krab's systems, steal the recipe, and destroy its ability to serve customers. In this competition, the Krusty Krab is the Blue Team, defending its services and infrastructure, while the Chum Bucket is the Red Team, attacking the network in an attempt to shut the restaurant down and take over Bikini Bottom.

Scoring

Krusty Krabs starts with 1,000,000 points

Upon every score check cycle, any service down will transfer 1,000 points from Krusty Krabs to Chum Bucket

Search for recipe:

The ingredients stated on the secret recipe is scattered throughout the Krusty Krabs' boxes, Red Team should search for them and submit the final recipe to Grey Team at the end of the competition.

Injects:

Will be distributed starting day 1 of competition. There will be different ones for blue team and red team. Some will involve direct competition between members from both teams.

Rules

1. In case of a scoring system failure, both Red and Blue teams should be honest about what scored services are down while Grey team is fixing it. This does not mean they have to give away their full capabilities, but any team attempting to lie to the Grey team in order to gain points that they did not earn is strictly forbidden.
2. If Grey Team decides to pause the competition for any reason, both teams must immediately stop their work while Grey Team is fixing the problem. No one should be accessing their boxes or running any commands until the competition is resumed.
3. Do not remove any grey team service accounts
4. Do not give intentionally dishonest statements to the Grey Team
5. Both red and blue teams shouldn't be destructive towards their own team.
6. Red Team attacks must be non-destructive. Modifying or destroying data, wiping databases, or bricking operating systems is forbidden.
7. Blue team may not set up firewall rules that blocks scoring infrastructure and red team may not destroy/tamper with scoring systems

Rules

8. Grey Team reserves the right to modify, remove, or add rules to this packet with notice given to each team involved
9. All participants must maintain mutual respect at all times. Disruptive, abusive, or unsportsmanlike behavior will result in disciplinary action, up to and including immediate disqualification.
10. You must follow any directive issued to your team by the Grey Team, verbal or in writing.
11. Do not attack, destroy, or attempt to attack or destroy any Cyberrange property. This includes physical infrastructure (computers, chairs, etc) and virtual infrastructure (attempting to access management networks, denial of service attacks, etc.
12. Any tools used must be adequately tested in good faith first. Do notify Grey Team if any tools used behave in unexpected ways which may degrade the competition experience
13. Do not change IP addressing/Network Settings
14. Don't remove crucial system files (Ex. System32)

Rules

15. Red Team may only target systems within the defined competition scope. Blue Team may not retaliate against or attack Red Team's infrastructure.

16.Teams may not collude, share credentials, exploits, or intelligence with other competing teams.

17. Do not access the infrastructure outside of competition time (unless permission is explicitly given by the Grey Team)

18. Teams may not manipulate system time to interfere with logging, monitoring, scoring, or triage.

19. Teams may not intentionally trigger repeated authentication failures to lock out opposing teams or Gray Team accounts.

20. Blue Team may not enable Windows Defender or similar antivirus software on their machines

21. When editing a service's config files or other forms of persistence, please back up these files so that they are recoverable.

22. Drop all, blocking subnets, etc. will not be allowed.

Access

Blue team:

The team will be provided with jumpboxes that they can connect to their VPN, such as Tailscale, to access infrastructure via RDP, SSH, and WinRM.

Red team:

OpenStack network will be provided. Red team members can set up any number of hosts they'd like. Please do not accidentally attack scoring boxes on the same subnet.
